- n) Tooth and soft tissue preparation, crown lengthening, cement bases, direct and indirect pulp capping, bonding agents, lining agents, occlusal adjustments (D9951), polishing, local anesthesia and any other associated procedures are included in the fee for a completed restorative service.
- o) The original provider is responsible for any replacement restorations necessary in primary teeth within the first 12 months and permanent teeth within the first 36 months, except when failure or breakage results from circumstances beyond the control of the provider (such as due to a patient's oral habits). Radiographs (and photographs, as applicable) shall be submitted for payment to demonstrate the need for replacement.

- h) Prefabricated crowns are not a benefit for abutment teeth for cast metal framework partial dentures (D5213 and D5214).

C. Primary and Permanent Teeth:

- a) Prefabricated crowns provided solely to replace tooth structure lost due to attrition, abrasion, erosion or for cosmetic purposes are not a benefit.
- b) Prefabricated crowns are not a benefit when the prognosis of the tooth is questionable due to non-restorability or periodontal involvement.
- c) Prefabricated crowns are not a benefit when a tooth can be restored with an amalgam or resin-based composite restoration.
- d) Tooth and soft tissue preparation, crown lengthening, cement bases, direct and indirect pulp capping, amalgam or acrylic buildups, pins (D2951), bonding agents, occlusal adjustments (D9951), local anesthesia (D9210) and any other associated procedures are included in the fee for a prefabricated crown.
- e) The original provider is responsible for any replacement prefabricated crowns necessary in primary teeth within the first 12 months and permanent teeth within the first 36 months, except when failure or breakage results from circumstances beyond the control of the provider (such as due to a patient's oral habits). Radiographs (and photographs, as applicable) shall be submitted for payment to demonstrate the need for replacement.

3. Laboratory Processed Crowns (D2710-D2792):

- a) Laboratory processed crowns on permanent teeth (or over-retained primary teeth with no permanent successor) are a benefit only once in a five year period except when failure or breakage results from circumstances beyond the control of the provider (such as due to a patient's oral habits).
- b) Prior authorization with current periapical and arch radiographs is required. Arch films are not required for crown authorizations if the Medi-Cal Dental Program has paid for root canal treatment on the same tooth within the last six months. Only a periapical radiograph of the completed root canal treatment is required.
- c) A benefit for patients age 13 or older when a lesser service will not suffice because of extensive coronal destruction. The following criteria shall be met for prior authorization:
  - i) Anterior teeth shall show traumatic or pathological destruction to the crown of the tooth, which involves at least one of the following:

- a. the involvement of four or more surfaces including at least one incisal angle. The facial or lingual surface shall not be considered involved for a mesial or proximal restoration unless the proximal restoration wraps around the tooth to at least the midline,
  - b. the loss of an incisal angle which involves a minimum area of both half the incisal width and half the height of the anatomical crown,
  - c. an incisal angle is not involved but more than 50% of the anatomical crown is involved.
- ii) Bicuspids (premolars) shall show traumatic or pathological destruction of the crown of the tooth, which involves three or more tooth surfaces including one cusp.
  - iii) Molars shall show traumatic or pathological destruction of the crown of the tooth, which involves four or more tooth surfaces including two or more cusps.
  - iv) Posterior crowns for patients age 21 or older are a benefit only when they act as an abutment for a removable partial denture with cast clasps or rests (D5213 and D5214) or for a fixed partial denture which meets current criteria.
  - v) Posterior crowns for patients under the age of 21 that shall restore a successfully treated endodontic bicuspid or molar tooth.
- d) Restorative services provided solely to replace tooth structure lost due to attrition, abrasion, erosion or for cosmetic purposes are not a benefit.
  - e) Laboratory crowns are not a benefit when the prognosis of the tooth is questionable due to non-restorability or periodontal involvement.
  - f) Laboratory processed crowns are not a benefit when the tooth can be restored with an amalgam or resin-based composite.
  - g) When a tooth has been restored with amalgam or resin-based composite restoration within 36 months, by the same provider, written documentation shall be submitted with the TAR justifying the medical necessity for the crown request. A current periapical radiograph dated after the restoration is required to demonstrate the medical necessity along with arch radiographs.
  - h) Tooth and soft tissue preparation, crown lengthening, cement bases, direct and indirect pulp capping, amalgam or acrylic buildups, pins (D2951), bonding agents, lining agents, impressions, temporary crowns, occlusal adjustments (D9951), polishing, local anesthesia (D9210) and any other associated procedures are included in the fee for a completed laboratory processed crown.
  - i) Arch integrity and overall condition of the mouth, including the patient's ability to maintain oral health, shall be considered for prior authorization, which shall be based upon a supportable five year prognosis for the teeth to be crowned.
  - j) Indirectly fabricated or prefabricated posts (D2952 and D2954) are a benefit when medically necessary for the retention of allowable laboratory processed crowns on root canal treated permanent teeth.
  - k) Partial payment will not be made for an undelivered laboratory processed crown. Payment shall be made only upon final cementation.

## Endodontic General Policies (D3000-D3999)

- a) Prior authorization with current periapical radiographs is required for patients age 21 or older and not required for patients under the age of 21 for initial root canal therapy (D3310, D3320 and D3330); and root canal retreatment (D3346, D3347 and D3348). Prior authorization is required for all ages for partial pulpotomy for apexogenesis (D3222), apexification/recalcification (D3351), and apicoectomy/~~periradicular surgery~~ (D3410, D3421, D3425 and D3426) and periradicular surgery without apicoectomy (D3427) on permanent teeth.
- b) Prior authorization for root canal therapy (D3310, D3320 and D3330) is not required when it is documented on a claim for payment that the permanent tooth has been accidentally avulsed or there has been a fracture of the crown exposing vital pulpal tissue. Preoperative radiographs (arch and periapicals) shall be submitted for payment.
- c) Root canal therapy (D3310, D3320, D3330, D3346, D3347 and D3348) is a benefit for permanent teeth and over-retained primary teeth with no permanent successor, if medically necessary. It is medically necessary when the tooth is non-vital (due to necrosis, gangrene or death of the pulp) or if the pulp has been compromised by caries, trauma or accident that may lead to the death of the pulp.
- d) The prognosis of the affected tooth and other remaining teeth shall be evaluated in considering endodontic procedures for prior authorization and payment. Endodontic procedures are not a benefit when the prognosis of the tooth is questionable (due to non-restorability or periodontal involvement).
- e) Endodontic procedures are not a benefit when extraction is appropriate for a tooth due to non-restorability, periodontal involvement or for a tooth that is easily replaced by an addition to an existing or proposed prosthesis in the same arch.
- f) Endodontic procedures are not a benefit for 3<sup>rd</sup> molars, unless the 3<sup>rd</sup> molar occupies the 1<sup>st</sup> or 2<sup>nd</sup> molar positions or is an abutment for an existing fixed or removable partial denture with cast clasps or rests.
- g) The fee for endodontic procedures includes all treatment and post treatment radiographs, any temporary restorations and/or occlusal seals, medicated treatments, bacteriologic studies, pulp vitality tests, removal of root canal obstructions (such as posts, silver points, old root canal filling material, broken root canal files and broaches and calcifications), internal root repairs of perforation defects and routine postoperative care within 30 days.
- h) Endodontic procedures shall be completed prior to payment. The date of service on the payment request shall reflect the final treatment date. A post treatment radiograph is not required for payment.
- i) Satisfactory completion of endodontic procedures is required prior to requesting the final restoration.

## Periodontal General Policies (D4000-D4999)

- a) Periodontal procedures shall be a benefit for patients age 13 or older. Periodontal procedures shall be considered for patients under the age of 13 when unusual circumstances exist such as aggressive periodontitis and drug-induced hyperplasia and the medical necessity has been fully documented on the TAR.
- b) Prior authorization is required for all periodontal procedures except for unscheduled dressing change (by someone other than the treating dentist) ~~(D4290)~~ (D4920) and periodontal maintenance (D4910).
- c) Current periapical radiographs of the involved areas and bitewing radiographs are required for periodontal scaling and root planing (D4341 and D4342) and osseous surgery (D4260 and D4261) for prior authorizations. ~~A panoramic radiographic image alone is non-diagnostic for periodontal procedures.~~
- d) Photographs are required for gingivectomy or gingivoplasty (D4210 and D4211) for prior authorizations.
- e) Only teeth that qualify as diseased are to be considered in the count for the number of teeth to be treated in a particular quadrant. A qualifying tooth shall have a significant amount of bone loss, presence of calculus deposits, be restorable and have arch integrity and shall meet Medi-Cal Dental Program criteria for the requested procedure. Qualifying teeth include implants. Teeth shall not be counted as qualifying when they are indicated to be extracted. Full or partial quadrants are defined as follows:
  - i) a full quadrant is considered to have four or more qualifying diseased teeth,
  - ii) a partial quadrant is considered to have one, two, or three diseased teeth,
  - iii) third molars shall not be counted unless the third molar occupies the first or second molar position or is an abutment for an existing fixed or removable partial denture with cast clasps or rests.
- f) Tooth bounded spaces shall only be counted in conjunction with osseous surgeries (D4260 and D4261) that require a surgical flap. Each tooth bounded space shall only count as one tooth space regardless of the number of missing natural teeth in the space.
- g) Scaling and root planing (D4341 and D4342) are a benefit once per quadrant in a 24 month period. Patients shall exhibit connective tissue attachment loss and radiographic evidence of bone loss and/or subgingival calculus deposits on root surfaces.
- h) Gingivectomy or gingivoplasty (D4210 and D4211) and osseous surgery (D4260 and D4261) are a benefit once per quadrant in a 36 month period and shall not be authorized until 30 days following scaling and root planing (D4341 and D4342) in the same quadrant. Patients shall exhibit radiographic evidence of moderate to severe bone loss to qualify for osseous surgery.
  - i) Gingivectomy or gingivoplasty (D4210 and D4211) and osseous surgery (D4260 and D4261) includes three months of post-operative care and any surgical re-entry for 36 months. Documentation of extraordinary circumstances and/or medical conditions will be given consideration on a case-by-case basis.
- j) Scaling and root planing (D4341 and D4342) can be authorized in conjunction with prophylaxis procedures (D1110 and D1120). However, payment shall not be made for any prophylaxis procedure if the prophylaxis is performed on the same date of service as the scaling and root planing.
- k) Gingivectomy or gingivoplasty (D4210 and D4211) and osseous surgery (D4260 and D4261) includes frenulectomy (frenectomy or frenotomy) (D7960), frenuloplasty (D7963) and/or distal wedge performed in the same area on the same date of service.

- l) Procedures involved in acquiring graft tissues (hard or soft) from extra-oral donor sites are considered part of the fee for osseous surgery (D4260 and D4261) and are not payable separately.
- m) Gingivectomy or gingivoplasty (D4210 and D4211) and osseous surgery (D4260 and D4261) performed in conjunction with a laboratory crown, prefabricated crown, amalgam or resin-based composite restoration or endodontic therapy is included in the fee for the final restoration or endodontic therapy and is not payable separately.

## Fixed Prosthodontic General Policies (D6200-D6999)

- a) Fixed partial dentures (bridgework) are considered beyond the scope of the Medi-Cal Dental Program. However, the fabrication of a fixed partial denture shall be considered for prior authorization only when medical conditions or employment preclude the use of a removable partial denture. **Most importantly, the patient shall first meet the criteria for a removable partial denture before a fixed partial denture will be considered.**
- b) Medical conditions, which preclude the use of a removable partial denture, include:
  - i) the epileptic patient where a removable partial denture could be injurious to their health during an uncontrolled seizure,
  - ii) the paraplegia patient who utilizes a mouth wand to function to any degree and where a mouth wand is inoperative because of missing natural teeth,
  - iii) patients with neurological disorders whose manual dexterity precludes proper care and maintenance of a removable partial denture.
- c) Documentation for medical conditions shall be submitted for prior authorization that includes a written, signed and dated statement from the patient's physician, on their professional letterhead, describing the patient's medical condition and the reason why a removable partial denture would be injurious to the patient's health.
- d) Documentation for obtaining employment shall be submitted for prior authorization that includes a written statement from the patient's case manager or eligibility worker stating why the nature of the employment precludes the use of a removable partial denture.
- e) Fixed partial dentures are a benefit once in a five-year period only on permanent teeth when the above criteria are met.
- f) Current periapical radiographs of the retainer (abutment) teeth and arch radiographs are required for prior authorization.
- g) Fixed partial dentures are not a benefit when the prognosis of the retainer (abutment) teeth is questionable due to non-restorability or periodontal involvement.
- h) Posterior fixed partial dentures are not a benefit when the number of missing teeth requested to be replaced in the quadrant does not significantly impact the patient's masticatory ability.
- i) Tooth and soft tissue preparation, crown lengthening, cement bases, direct and indirect pulp capping, amalgam or acrylic buildups, ~~pins~~ pin retention-per tooth, in addition to restoration (D2951), bonding agents, lining agents, impressions, temporary crowns, ~~adjustments~~ occlusal adjustment-limited (D9951), polishing, local anesthesia (D9210) and any other associated procedures are included in the fee for a completed fixed partial denture.
- j) Arch integrity and overall condition of the mouth, including the patient's ability to maintain oral health, shall be considered for prior authorization. Prior authorization shall be based upon a supportable five-year prognosis for the fixed partial denture retainer (abutment).
- k) Fixed partial denture retainers (abutments) on root canal treated teeth shall be considered only after satisfactory completion of root canal therapy. Post root canal treatment periapical and arch radiographs shall be submitted for prior authorization of fixed partial dentures.
- l) Partial payment will not be made for an undelivered fixed partial denture. Payment will be made only upon final cementation.
- m) Fixed partial denture inlay/onlay retainers (abutments) (D6545 and D6634) are not a benefit.
- n) Cast resin bonded fixed partial dentures (Maryland Bridges) are not a benefit.

## Adjunctive General Policies (D9000-D9999)

### Anesthesia (D9210-D9248)

- a) ~~General anesthesia (D9220 and D9221)~~ Deep sedation/general anesthesia (D9222 and D9223) is defined as a controlled state of unconsciousness, accompanied by a partial or complete loss of protective reflexes, including the loss of the ability to independently maintain an airway and respond purposefully to physical stimulation or verbal command, produced by a pharmacologic or non-pharmacologic method or combination thereof.
- b) Intravenous moderate (conscious) sedation/analgesia (D9241 and D9242 D9239 and D9243) is a medically controlled state of depressed consciousness while maintaining the patient's airway, protective reflexes and the ability to respond to stimulation or verbal commands. It includes intravenous (IV) administration of sedative and/or analgesic agent(s) and appropriate monitoring.
- c) Non-intravenous conscious sedation (D9248) is a medically controlled state of depressed consciousness while maintaining the patient's airway, protective reflexes and the ability to respond to stimulation or verbal commands. It includes administration of sedative and/or analgesic agent(s) by a route other than IV (oral, patch, intramuscular or subcutaneous) and appropriate monitoring.
- d) ~~Deep sedation/general anesthesia (D9220 and D9221) and intravenous conscious sedation/analgesia (D9241 and D9242) shall be considered for payment when it is documented why local anesthesia is contraindicated. Such contraindications shall include the following:~~
- ~~i) a severe mental or physical handicap;~~
  - ~~ii) extensive surgical procedures;~~
  - ~~iii) an uncooperative child;~~
  - ~~iv) an acute infection at an injection site;~~
  - ~~v) a failure of a local anesthetic to control pain.~~

Behavior modification and local anesthesia shall be attempted first before any type of sedation is considered. If this fails or is not possible due to the patient's medical condition, then sedation shall be considered. If sedation is indicated, then the least profound procedure shall be attempted first. The least profound procedure is inhalation of nitrous oxide/analgesia, anxiolysis (D9230) or non-intravenous conscious sedation (D9248), the next profound procedure is intravenous moderate (conscious) sedation/analgesia (D9239 and D9243) and the most profound is deep sedation/general anesthesia (D9222 and D9223).

- e) If the provider provides clear medical/dental documentation of both i) and ii) below then the patient shall be considered for prior authorization for deep sedation/general anesthesia (D9222 and D9223) or intravenous moderate (conscious) sedation/analgesia (D9239 and D9243). If the provider documents any one of iii) through vi) then the patient shall be considered for prior authorization for deep sedation/general anesthesia (D9222 and D9223) or intravenous moderate (conscious) sedation/analgesia (D9239 and D9243).
- i) Use of local anesthesia to control pain failed or was not feasible based on the medical needs of the patient. Written documentation from the referring/treating provider shall include a copy of the patient record indicating such a failure or why it was not feasible based on the medical needs of the patient.
  - ii) Use of inhalation of nitrous oxide/analgesia, anxiolysis (D9230) or non-intravenous conscious sedation (D9248) failed or was not feasible based

- on the medical needs of the patient. Written documentation from the referring/treating provider shall include a copy of the patient record indicating such a failure or why it was not feasible based on the medical needs of the patient.
- iii) Use of effective communicative techniques and the ability for immobilization of the patient (patient is dangerous to self or staff) failed or was not feasible based on the medical needs of the patient. Written documentation from the referring/treating provider shall include a copy of the patient record indicating such a failure or why it was not feasible based on the medical needs of the patient.
- iv) Patient requires extensive dental restorative or surgical treatment that cannot be rendered under local anesthesia or conscious sedation. Radiographs (and photographs, if applicable) shall be submitted demonstrating such proposed treatment and shall be included on the same Treatment Authorization Request (TAR).
- v) Patient has acute situational anxiety due to immature cognitive functioning. Written documentation from the referring/treating provider shall include a copy of the patient record indicating such a condition.
- vi) Patient is uncooperative due to certain physical or mental compromising conditions. Patient is either a Registered Consumer from the Department of Developmental Services or written documentation from the patient's physician (on their professional letterhead) indicates such a condition.
- f) Patients with certain medical conditions such as, but not limited to: moderate to severe asthma, reactive airway disease, congestive heart failure, cardiac arrhythmias and significant bleeding disorders (continuous anticoagulant therapy such as Coumadin therapy) shall be treated in a hospital setting or a licensed facility capable of responding to a serious medical crisis.
- e)g) The administration of deep sedation/general anesthesia (~~D9220 and D9221~~ D9222 and D9223), inhalation of nitrous oxide/analgesia, anxiolysis (D9230), intravenous moderate (conscious) sedation/analgesia (~~D9241 and D9242~~ D9239 and D9243) and therapeutic parenteral drug (D9610) is a benefit in conjunction with payable associated procedures. Prior authorization or payment shall be denied if all associated procedures by the same provider are denied.
- f)h) Only one anesthesia procedure is payable per date of service regardless of the methods of administration or drugs used. When one or more anesthesia procedures are performed only the most profound procedure will be allowed. The following anesthesia procedures are listed in order from most profound to least profound:
- i) Procedure ~~D9220/D9221~~ D9222/D9223 (Deep Sedation/General Anesthesia),
  - ii) Procedure ~~D9241/D9242~~ D9239/D9243 (Intravenous Moderate (Conscious) Sedation/Analgesia),
  - iii) Procedure D9248 (Non-Intravenous Conscious Sedation),
  - iv) Procedure D9230 (Inhalation Of Nitrous Oxide/Analgesia, Anxiolysis).
- e)j) Providers who administer general anesthesia (~~D9220 and D9221~~ D9222 and D9223) and/or intravenous moderate (conscious) sedation/analgesia (~~D9241 and D9242~~ D9239 and D9243) shall have valid anesthesia permits with the ~~California Dental Board~~ Dental Board of California.
- j) Evaluation for anesthesia procedures is included in the fees for anesthesia and oral evaluation procedures.

- i)l) Anesthesia time for general anesthesia and intravenous conscious sedation is defined as the period between the beginning of the administration of the anesthetic agent and the time that the anesthetist is no longer in personal attendance.
- j)m) Sedation is a benefit in conjunction with the surgical removal of wires, bands, splints and arch bars.
